

## Seminars of the Institute of Radiocommunications In the winter semester of the academic year 2022/23

- 1. AM Technologies**  
„Prezentacja najnowszych oscyloskopów Keysight MXR”  
(in Polish)  
**13 October 2022**
- 2. Łukasz Kułacz**  
“Utilization of Context Information for Spectral-Efficiency Enhancement in Future Radio Communication Systems”  
**27 October 2022**
- 3. Bartosz Włodarczak**  
“DIST: Deterministic In-System Test with X-masking”  
**3 November 2022**
- 4. Cezary Adamczyk**  
“Detection of Decision Conflicts Between xApp Applications in Intelligent Radio Controllers of the O-RAN Network”  
**17 November 2022**
- 5. Saif Sabeeh**  
“Radio resource management for C-V2X communication systems”  
**1 December 2022**
- 6. Michał Sybis, Paweł Sroka, Adrian Kliks**  
“Database Supported Successive Interference Cancellation Scheme for Intra-platoon Communications”  
**22 December 2022**
- 7. Małgorzata Wasilewska**  
“Secure, federated learning-based spectrum sensing”  
**12 January 2023**

The seminars take place in the building of the Faculty of Computing and Telecommunications, 3 Polanka Str. Room no. 101, at 11:45.

Prof. dr hab. inż. Hanna Bogucka
